PROFILE

TECTUS / GPS NAVIGATION / Profile

TECTUS

always in the best position. . .

TECTUS and **MRD Technologies** are developing GPS car Navigation systems for the automotive after sales market, based on the European Automotive requirements.

MRD with focus on PDA and GPS technology and **TECTUS** with more than 20 years Automotive experience, are developing and designing customize **GPS Navigation - IN BUILT - Systems** as a perfect solution in DESIGN AND AUTOMOTIVE QUALITY alternative to Plug & Play and fix installed OEM systems.

More than 50 people in design, developing and project management are working for **MRD** and **TECTUS** in Singapore, Germany and Switzerland.

All Project management with major OEM customers is locally done by **TECTUS** in Germany and Switzerland. The Development and Design Centre is located in Singapore.

TECTUS automotive products are produced in a highly qualified automotive and military approved production facility.

TECTUS and **Navigon** developed EasyDrive, a famous navigation software, based on **Navteq** for borderless navigation all over Europe.

Based on this **TECTUS** customers are **always in the best position. . . !**
